

# Youth on Boards Action on Climate!

## **Our Story..**

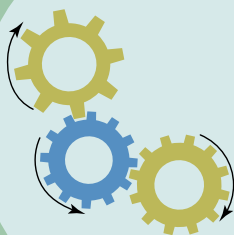

In 2020, an intergenerational group met to discuss working in solidarity on climate change. The secret power they discovered? Combining the passion & urgency of young people with the networks & influence of older people.

## **Our Goal..**

Increase the number of young people (teens to twenties) in Maine-based government, nonprofit and private sector organizations, as full decision makers.

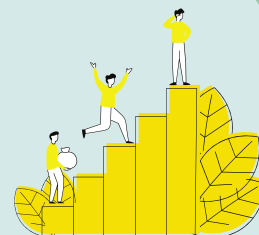

## **Our Method..**

Identify organizations receptive to including youth on boards. Create a database of young people interested in leadership. Match young people with boards. Provide training & resources to facilitate productive inclusion.

## **Our Impact..**

Elevating young people to decision-making positions will promote climate-focused changes to visions, missions, strategies and budgets across Maine!
